Beefmaster Production Sale
October 19, 2013
Dear Beefmaster Friends,

Our family would like to invite everyone to come see us on Friday October 18th, 2013 to view the cattle offered in this year’s sale which will be held at 10:30 a.m. (EST), Saturday, October 19th. We invite you to fellowship with us and other Beefmaster cattle breeders, as well as new members that have interest in the great American breed of cattle, Beefmaster.

I am very proud of this year’s offering, which consists of six herd sire prospects, forty-two heifers, and three semen lots. Our herd sire prospects not only have the “look” with meat, bone, and balance but pedigrees that come from some of the greatest cattle ever produced.

These bulls have performance, pedigree, and phenotype which will add value to your next calf crop; producing calves that will have depth of body, thickness, but yet be pretty with good feet and legs. Most of these bulls are very unique and will not be able to be reproduced by us again, making them even more exclusive and valuable to a breeder’s operation.

The forty-two heifers consist of the production from the last two and a half years with nothing held back. What you see is what we have produced from our embryo calves as well as natural calves out of great bulls such as Cat-man-do, Panama Jack, and Black Synergy (polled). Most of all the bred and exposed heifers are carrying calves from French Revolution to bring in French Connection and 76/0, our King Cotton and Jungle Red daughter. She is as powerful and correct as any female I have ever seen. French Revolution is extremely long and clean with good bone structure and loads of meat and thickness, which we believe will complement the females we have bred him to such as: Sugar Britches, Cat-man-do, Black Synergy, and others. Breeding French Revolution to these females not only adds more performance but continues to add pedigree and consistent predictability from these legendary cattle families.

Lastly, I would like to mention the E6 heifers that I am very proud of. They demonstrate all the reasons why we should breed Beefmaster bulls. Most of their dams are recips in our program and are good cows, but nothing like these heifers. I am truly amazed at what one cross with a great Beefmaster bull can produce when bred to what I consider an average commercial female. I would have been glad to keep these heifers to see what would have been produced from them next, but like I said before, we held nothing back.

I hope you can come out and join us for the sale because we are truly excited about what we have to offer. If myself, Justin, Bruce, Anthony, or Mike can help you in any way please give us a call. God Bless You!

Hope to see you at the ranch,
Paul Hill

Dear Beefmaster Breeder,

Thunder Valley Ranch has a reputation of producing quality individuals built on proven superior producing genetics that also have the visual quality required for marketplace rewards. Your opportunity to select from the most recent production will be at the Thunder Valley Ranch Days of Thunder Production Sale to be held at the ranch in Commerce Georgia, Saturday October 19th at 10:30 am Eastern Standard Time.

Thunder Valley Ranch Days of Thunder Production Sale offering is a true production sale consisting of the last two years production offered to you as Bred Heifers, Open Heifers and a select group of Herdsire Prospects. These individuals are the example of what TVR is determined to produce displaying the desired conformation, proven superior producing genetics and documented and confirmed performance. There are individuals throughout this sale offering that are destined to be the future cornerstones of breeding programs wherever they go. This sale offering is a direct result of Paul and Justin, his son and ranch manager, determination and dedication to producing a Beefmaster product that will make the breed better.

Thunder Valley Ranch Days of Thunder Production Sale has the Open Heifers that have the maternal strength of production combined with proven genetics to help put your breeding program in the quality product you desire. The age range on these will be from 8 months to 18 months. Consisting of a large number of Cat-man-do and Panama Jack daughters. This will be the first offering from these young studs and they both bring the individual stats, quality and genetics necessary for your breeding success. The Bred Heifers not only offer cutting edge genetics with visual quality, measured performance, carcass traits to sustain and improve any breeding program they have great babies by French Revolution in the belly! The Herdsire Prospects have been selected as such. We did not put all the bulls produced in the sale just these few that excelled in all the important traits and will be an asset to your breeding program.

Thunder Valley Ranch has proven through their production to be a quality first Beefmaster breeder. This sale offering has what you need and you will be treated to some great hospitality! Now is the time for you to make plans to join us at the ranch for the Days of Thunder Production sale and get some TVR genetics in your breeding program.

We do have a sale offering DVD available and if myself or the sale consultants Mike Green, Anthony Mihalski can be of any assistance in making selections or purchases do not hesitate to contact us.

See you in Commerce!
Bruce Robbins
Dear Beefmaster Breeders,

It has always been my pleasure to work with Thunder Valley Ranch in Commerce, GA. Paul and son Justin have from the very beginning been able to produce seedstock Beefmaster cattle with marketability and quality. They have always used herd sires and dams that stand at the top of Beefmaster genotype to insure the buyers a very marketable herd acquisition!

On October 19th in Commerce, Georgia you, as buyers, will have the opportunity to acquire their product of years in the making through their embryo transfer and A.I. program. If popular pedigree coupled with quality is your goal then you won’t want to miss this sale. We will offer herdsire prospects, open and bred heifers. The youth of the program!

Paul not only understands the purebred business but has been actively involved in every facet of the ranch to rail program. He has even gone so far as to have been involved with the ultimate product of Beefmaster beef as he was co-owner of a restaurant chain in north Georgia. Understanding the process of seedstock to plate gives him insight as to the product he needs to produce on his farm. Muscle and yield have always played a part in his selection process as a purebred Breeder.

Paul and Justin also unsselfishly give their time to association work as they serve in various capacities in the Southeast and BBU. I tell you this to let you know that they are very dedicated to the Beefmaster Breed and it’s members.

If I can help you in any way with the sale, please let me know. I love talking about Beefmaster cattle and it’s members. It has been a major part of my life since 1987. See you in Commerce, GA October 19th.

Sincerely,

Mike Green

HERDSIRE PROSPECT

1233

THUNDER VALLEY RANCH

Breeder: TVR
DOB: 10/16/2011
BBU No. C1019262
Sex: Male
Color: RED

It is true: great bulls come from great cows, and Kiffer's Prissy was one of the greatest cows we have ever owned. This bull not only has the look, the meat, and power; but good balance, feet and legs, and the perfect Beefmaster red color. He has good performance #’s and EPD’s in a very docile package that anyone can handle.

### Individual Comments

- **Houston's Diamond**
  - A very deep bodied, dark red Houston daughter out of Sierra our 14 year old Synergy daughter out of Farrah Lady. Sierra has done it all for us, from being a great donor to raising a calf every year since we've had her. This is going to be a great cow.

- **Infinite Lace**
  - Infinity and Sugar Ann up close. Finding heifers like this is almost impossible. Long clean and bred to French Revolution to add in, 6/2 and Jungle Red. You can't go wrong here.

- **Ebony Oasis**
  - Another very long polled heifer out of one of our best donors 850. Half sister to Cat-Man-Do. Bred to French Revolution.

A beautiful polled heifer out of one of my favorite cows, and after you see this heifer you will understand. Show Prospect.

A very friendly, strong topped, clean heifer. Would make a good show heifer.

Another red polled heifer out of a cow that has never produced a bull calf. Check out this heifers half sister. Can you ask for more? Great cow family that works over and over.
34 1326  **Proof in the Pudding**  OPEN HEIFER SHOW PROSPECT
THUNDER VALLEY RANCH

Breeder: TVR  
DOB: 10/31/2012  
BBU No. C1027508  
Sex: Female  
Color: RED

A very thick topped, long heifer out of one of my favorite cows. Proven Prissy was produced from a flush I bought from Windy Hills a few years ago.

</table>
Bidding: Each animal will be sold to the highest bidder without reserve.

Bidding Dispute: The Auctioneer in charge will settle any dispute as to bids, and his decision on such matters shall be final.

Cash Sale: All sales are for cash unless satisfactory credit arrangements, including any possible reservation of security interest by the seller, have been made with the seller prior to sale. The failure of a member buyer to pay the appropriate price for the sale amounts when due may constitute a cause for exclusion from BBU pursuant to Article I, Section 10 of the BBU Bylaws.

Buyer's Risk at the Time of Sale: The risk of loss and injury of each animal passes to the buyer as soon as it is sold; however, it is the obligation of the seller to ensure that sold animals are fed and cared for free of charge to the buyer until loaded for shipment or until the expiration of 24 hours after the sale, whichever occurs sooner.

Certificates of Registration: A transferred certificate of registration must be furnished by the seller free of charge to the buyer for each animal within 45 days following the later of either the date of sale or upon the receipt of full payment.

Health Guarantees: Unless otherwise announced, the seller guarantees that all animals are eligible for Interstate shipment as required by applicable federal and state regulations.

Announcements: If there is any inconsistency in information in terms of the sale materials (e.g., sale catalog, supplemental sheets, sale day announcements), 1) sale day announcements will control over the supplemental sheet and the sale catalog, and 2) the supplemental sheet will control over the sale catalog.

Identification Responsibilities: 1) Prior to the sale, the seller must ensure that each animal has a readable permanent identification mark (tattoo, hot-brand or freeze brand) corresponding to its registration identification and 2) The buyer must check all permanent identification marks for accuracy upon possession and report any discrepancies to the seller.

Artificial Insemination (AI) Certificates: Embryo Transfer (ET) Bills of Sale: AI certificates and ET bills of sale will be the responsibility of the seller.

Conformance with Registration Guarantees: 1) The seller guarantees that all sold animals are registered in accordance with the rules of BBU and 2) The seller guarantees to the buyer that all sold animals conform to the registration certificate as entered in the Herd Book of BBU.

Official BBU Information: All existing available official BBU performance information, including calf count, must be included in the sale catalog.

Pedigree, Performance and Genetic Information Guarantees: The seller guarantees to the buyer that: 1) the pedigree, performance data and genetic information, as represented in all sale materials (including sale catalog, supplemental sheet or sale day announcement), are accurate; and, 2) all information from the BBU database is uncorrected and is acceptably stated "as of" date. The absence in any sale materials of a specific designation on the pedigree of an animal does not establish that the animal in question is not a carrier of such genetic defect.

Breedin Guarantees: 1) The seller guarantees that all animals are breeders, with the exception of: (a) calves under 12 months of age at the time of sale; if the sale has occurred in the last 180 days prior to the sale, such animals are guaranteed to be breeders; (b) animals that are not breeders other than incorrect parentage, the seller must make a satisfactory adjustment on the purchase price to the buyer, if the buyer requests a refund of the full purchase price or, shall have 180 days from the date the animal is returned to the seller's farm to conduct a trial to demonstrate the returned animal is a breeder. Refund of the full purchase price or demonstrated proof that the animal is a breeder during the test trial shall be deemed full satisfaction and settlement of the claim. Any expense incurred by the seller exercising either such option, the claim shall be deemed fully and satisfactory resolved. However, in the event that the buyer requests a refund of the purchase price, the seller may, at its option, either issue a refund of the purchase price upon return of the animal to the farm of the seller. Any claim for adjustment or refund under this paragraph must be in writing to the seller within 180 days of the birth of the calf.

6) If a female represented as "safe in calf" to a certain bull at the time of sale proves to have been bred to a different bull, the seller must make a satisfactory adjustment on the purchase price to the buyer or, at the buyer's option, refund the purchase price upon the return of the animal to the farm of the seller. Any claim for adjustment or refund under this paragraph must be in writing to the seller within 180 days of the birth of the calf.

6) If a female represented as "safe in calf" to a certain bull at the time of sale proves to have been bred to a different bull, the seller must make a satisfactory adjustment on the purchase price to the buyer or, at the buyer's option, refund the purchase price upon the return of the animal to the farm of the seller. Any claim for adjustment or refund under this paragraph must be in writing to the seller within 180 days of the birth of the calf.

7) If the female is represented as "safe in calf" to a certain bull at the time of sale proves to have been bred to a different bull, the seller must make a satisfactory adjustment on the purchase price to the buyer or, at the buyer's option, refund the purchase price upon the return of the animal to the farm of the seller. Any claim for adjustment or refund under this paragraph must be in writing to the seller within 180 days of the birth of the calf.

8) If a male is represented as a carrier of any genetic defect or genetic factor recognized by BBU, the seller must make a satisfactory adjustment on the purchase price to the buyer or, at the buyer's option, refund the purchase price upon the return of the animal to the farm of the seller. Any claim for adjustment or refund under this paragraph must be in writing to the seller within 180 days of the birth of the calf.

No Sex Guarantees: There are no representations as to the sex of offspring unless the seller makes a specific guarantee that offspring will be of a particular sex.

Delivery: The seller must disclose in the catalog or from the block any caincarnation or other surprise in the identity of any male or female known to the seller and any other clues or super-ovulation flash of any female known to the seller.

Semen: Unless otherwise agreed by the buyer and the seller (with respect to the sale of semen), the seller makes no guarantees with respect to the performance or characteristics of such semen and the buyer is purchasing such semen "as is."
